PROFESSIONAL SUMMARY

Data and BI analyst with hands-on experience building dashboards, modeling metrics and analyzing data in a large corporate environment (CNH Industrial). Gathered requirements with stakeholders, defined KPIs, built analytical reports and automated processes with Power BI, SQL, Python and Power Automate. Focused on producing actionable insights and supporting strategic decision-making. Seeking an internship or a Data / BI Analyst position to deepen my expertise in visualization, data storytelling and business intelligence.

WORK EXPERIENCE

CNH Industrial Mar 2024 – Aug 2025
Data & BI Intern | Curitiba, Brazil

- Gathered requirements with managers and business teams to define KPIs, metrics and visualization criteria for analytical dashboards, keeping business needs and technical solutions aligned.
- Built interactive Power BI dashboards with strategic indicators of operational performance and productivity, **cutting management analysis time by 30%**.
- Modeled data for BI: schemas, table relationships, DAX measures and business-rule documentation.
- Cleaned, transformed and consolidated large volumes of data with SQL and Python in Databricks to build reliable analytical layers.
- Created automated management reports with Power Query and Excel macros, **saving 30 minutes a day** and reducing manual consolidation errors.
- Automated data flows and operational processes with Power Automate, integrated with SharePoint and Power Apps.

FixFacil Assistência Virtual Nov 2023 – Feb 2024
Software Development Intern | Curitiba, Brazil

- Supported the development and maintenance of systems at an early-stage technology startup.
- Maintained an inventory control system with database persistence and queries.
- Used generative AI tools to speed up development and optimize implementations.

EDUCATION

UniSenai PR Mar 2023 – Expected Dec 2026
B.S. in Software Engineering | Curitiba, Brazil

- Relevant coursework: Machine Learning, Data Analysis, Software Architecture, Cloud Computing, Automation and Database Systems.
- Published 2 academic papers on Digital Transformation and Software Quality.
- Developed real projects for external companies as part of the curriculum.

TECHNICAL PROJECTS

Power BI Analytical Dashboards Jan 2024 – Jun 2024

- Built dashboards for the Finance, Production and HR departments with dynamic filters, KPIs and interactive charts.
- Modeled the data, created DAX measures and defined hierarchies for multidimensional analysis.
- Documented business rules, the data dictionary and the technical specifications of the delivered solutions.

3D Printer Management Dashboard Jun 2025 – Dec 2025

- Web dashboard for real-time monitoring of operational KPIs and the status of industrial equipment.
- Data ingestion pipeline with WebSockets and Node-RED to collect and process sensor metrics.
- Anomaly detection on time-series data to automatically identify offline equipment.

Simoldes — Industrial Management System Jan 2025 – Jul 2025

- System with full tracking of operation history, logs and productivity indicators for industrial machines.
- MongoDB database modeled for analytical queries and operational reports.

SKILLS & LANGUAGES

BI & Visualization: Power BI · DAX · Power Query · Advanced Excel · Dashboards · KPIs · Data Storytelling
Data Analysis: SQL · Python · Databricks · Exploratory Analysis · Data Modeling · SQL Server
Automation: Power Automate · Power Apps · Node-RED · Excel Macros · Python scripting
Development: Node.js · TypeScript · JavaScript · MongoDB · REST APIs
Tools: Git · GitHub · SharePoint · Postman · Vercel
Languages: Portuguese (Native, C2) · English (Fluent, B2/C1) · Spanish (Basic, A2)
